

AMENDMENT TO THE CLAIMS

The following listing of claims will replace all prior versions, and listing of claims in the application:

LISTING OF CLAIMS

1. (Currently amended) A screw bit connector comprising:

a body having a section of polygonal periphery and a section of circular periphery, an extension extending from an end of the section of polygonal periphery and a polygonal recess defined in an end of the extension, **a circular diameter of the extension being smaller than a diagonal width of the section of polygonal periphery,** a passage defined radially through a wall of the extension and being in communication with the polygonal recess, a bead received in the passage, a polygonal engaging **[[port]]stud** extending from an end of the section of circular periphery.

2. (Original) The connector as claimed in claim 1, wherein a flange extends radially from a periphery of the extension and a collar mounted to the extension and is stopped by the flange, a hole defined through the collar and limiting the bead from dropping from the passage.

3. (Currently amended) The connector as claimed in claim 1, wherein the polygonal engaging **[[port]]stud** has a boss extending from one of sides thereof.
